Onderwerp: RE: , is it possible to have a short telecom later today e.g. at 16:00 hrs?

Great news, Early March works for us. We need some time for preparations anyway. I'll put the wheels in motion to get the contract organized. Can you get me the required details (organization that will carry out the fact finding mission, proposal for deliverables, time line, rough initial cost estimate etc.). I will then make sure that these find their way into the request for offer which will then be sent out to you? Or to John?

Probably best to have a discussion with and yourselves early next week? After that we can involve KNMI, NAM, the suppliers and others. KNMI have offered full support and cooperation.
