**Onderwerp:** RE: , is it possible to have a short telecom later today e.g. at 16:00 hrs?

Dear ,

It turns out that using NORSAR for the review of all procedures is the fastest route, also from a contractual point of view. We are preparing a proposal which we will send to you and for comments.

Meanwhile we also would like to carry out the immediate feedback/audit on the technical audit on the KNMI identified issues and the solution that they have applied. Can you check if would be available for that at short notice (within the coming month).? We envisage one to two weeks work including a visit of a few days to the Netherlands etc.
