**Onderwerp:** Re: , is it possible to have a short telecom later today e.g. at 16:00 hrs?

hello again

I talked to , response for our network, and he would agree to do the audit. However he could start only in early March. He would be supported by one of his post-doc ) and I guess in some ways by me 8the overall picture ..).

has been in charge of our network since 2008 and know sensors etc. well, he also worked with ORFEUS and the ORFEUS Data Center (hosted at KNMI...). Currently he is heavily involve di the Mars seismometer. He is a very knowledge and very reasonable person.
