## BACKGROUND

As per the mining law a sound reduction guideline must be present at the rig site.

Below the reference in Dutch:

Besluit algemene regels milieu mijnbouw, artikel 43.

1. Er is een handleiding op de mobiele installatie aanwezig waarin regels zijn gesteld door de uitvoerder ten aanzien van transportbewegingen, pipehandling, het verbranden van aardgas in de openlucht en andere geluidsintensieve activiteiten.
2. De regels, bedoeld in het eerste lid, beperken de schade aan milieu en overlast voor de omgeving zo goed mogelijk.
3. De uitvoerder draagt er zorg voor dat een ieder die werkzaam is op de mobiele installatie bekend is met de handleiding en de regels, bedoeld in het eerste lid, naleeft.

## GUIDELINES

- A soundwall has been installed towards the nearby residential area.
- Doors in the soundwall will be closed at all times, except when passing through.
- Transport will be planned during daytime. Exceptions can be made, in case of unforeseen circumstances.
- All vehicles will use the newly constructed road as per transport plan and the road to the nearby village will be blocked by a barrier.
- Pipe handling at night times will be limited to what is required for operational reasons.
- Continuous sound measurement (see figure 1) has been installed and a daily report will be sent to Nedmag and the Drilling Supervisor. The outcome of the daily report will be discussed during the daily morning call.
- The rig is driven by electricity. Back up diesel generators will only be used in an emergency.
